

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in this application.

Listing of Claims:

1. (Currently Amended) A method comprising:

detecting that a telephone set has been connected to a telephone line; and

in response to the detection:

identifying the telephone line to which the telephone set has been connected;

retrieving a speed dial list from a database based on the identifying, wherein the

speed dial list is associated in the database with the telephone line; and

communicating a the speed dial list associated with the telephone line to the
telephone set.
2. (Original) The method of claim 1 wherein the detecting comprises receiving a
telephone call automatically placed by the telephone set via the telephone line in response to the
telephone set being connected to the telephone line.
3. (Currently Amended) The method of claim 2, wherein ~~further comprising identifying~~ the
telephone line to which the telephone set has been connected is identified based on at least one of
a calling party number and an automatic number identification associated with the telephone call.

4. (Original) The method of claim 2 wherein the communicating is performed within the telephone call.

5. (Original) The method of claim 2 further comprising:
providing, within the telephone call, an option to download the speed dial list; and
receiving, within the telephone call, a selection of the option.

6. (Original) The method of claim 1 further comprising:
storing the speed dial list in the telephone set.

7. (Original) A method comprising:
receiving a telephone call automatically placed by a telephone set via a telephone line in response to the telephone set being connected to the telephone line;
receiving, within the telephone call, a selection of an option to download a speed dial list;
communicating the speed dial list to the telephone set; and
storing the speed dial list in the telephone set.

8. (Currently Amended) A system comprising:
a processor to:

detect that a telephone set has been connected to a telephone line; and
in response to the detection:

identify the telephone line to which the telephone set has been connected;

retrieve a speed dial list from a database based on the identifying, wherein
the speed dial list is associated in the database with the telephone line; and
communicate a the speed dial list associated with the telephone line to
the telephone set.

9. (Original) The system of claim 8 wherein the processor is to detect that the telephone set has been connected to the telephone line by receiving a telephone call automatically placed by the telephone set via the telephone line in response to the telephone set being connected to the telephone line.

10. (Currently Amended) The system of claim 9 wherein the processor ~~is to identify~~ identifies the telephone line to which the telephone set has been connected based on at least one of a calling party number and an automatic number identification associated with the telephone call.

11. (Original) The system of claim 9 wherein the processor is to communicate the speed dial list within the telephone call.

12. (Original) The system of claim 9 wherein the processor is further to provide, within the telephone call, an option to download the speed dial list, and to receive, within the telephone call, a selection of the option.

13. (Currently Amended) A computer-readable medium having computer-readable content to cause a computer to perform acts of:

detecting that a telephone set has been connected to a telephone line; and

in response to the detection:

identifying the telephone line to which the telephone set has been connected;

retrieving a speed dial list from a database based on the identifying, wherein the speed dial list is associated in the database with the telephone line; and

communicating a the speed dial list associated with the telephone line to the telephone set.

14. (Original) The computer-readable medium of claim 13 wherein the detecting comprises receiving a telephone call automatically placed by the telephone set via the telephone line in response to the telephone set being connected to the telephone line.

15. (Currently Amended) The computer-readable medium of claim 14 wherein ~~the computer-readable content further causes the computer to perform act of identifying~~ the telephone line to which the telephone set has been connected is identified based on at least one of a calling party number and an automatic number identification associated with the telephone call.

16. (Original) The computer-readable medium of claim 14 wherein the communicating is performed within the telephone call.

17. (Original) The computer-readable medium of claim 14 wherein the computer-readable content further causes the computer to perform acts of:

providing, within the telephone call, an option to download the speed dial list; and
receiving, within the telephone call, a selection of the option.

18. (Original) The computer-readable medium of claim 13 wherein the computer-readable content further causes the computer to perform an act of:

storing the speed dial list in the telephone set.
